

# THE EMPRESS EXPRESS

VOLUME XIX, No. 45

EMPRESS, ALTA. THURSDAY, April 14th, 1932

Price: \$2.00 Per Year.

## United Church

Emphasis:  
Sunday School, 2:00 p.m.  
Public Worship, 7:30 p.m.  
A service will be conducted at—  
Wainfleet, 11 a.m.  
"Let us so live that in case someone feels impelled to speak a good word for us, he can do so without apologies."  
You are invited to worship with us.  
Rev. Geo. A. Shields,  
Minister.

## Minutes of R.M.

Mantario No. 262

Meeting of March 14, at Orange Hall, Culbether, 10 a.m., present, Reeve Walker and a full Council.

Minutes of previous meeting were read. No 14 was ordered corrected. Cn. Dahl pointed out that he moved that we joined the Association of Rural Municipalities, but that he did not move to send delegates to the Convention. He was of the opinion that this was moved by Cn. Montgomery.

Cn. Montgomery stated that after hearing what had been accomplished at the Convention he was quite willing to accept the responsibility for sending delegates. The minutes were corrected accordingly, and the minutes of previous meeting were then confirmed on motion of Cn. Hawtin.

Committees—Reeve Walker re Alaskan hospital. Reported that Nurse McLean had felt obliged to give up the operation of the hospital, and that there were only two courses open; either to close the institution or to take it over as a public institution.

A Hospital Board had therefore been formed of representatives of the municipal units concerned who accepted responsibility in certain proportions agreed between them—a joint loan had been made to take over the interest in the equipment which belonged to Miss McLean, and this would be repaid to the different units out of surplus earnings as soon as the institution was on a sound financial footing.

## Change Is Proposed In West Train Service

A G.P.R. bulletin posted gives notice that instead of three mixed trains a week each way, the branch lines, Empress to Bassano or Lethbridge, commence May 1st, will be served by two trains a week. The mixed train will arrive Mondays and Thursdays and leave Tuesdays and Fridays. Time of arrival is expected to be about 6:00 p.m. and time of leaving in the morning about one hour earlier.

The East Coulees mixed train will be discontinued. This line will be served by a train running from Drumheller to Rosemary, where it will make connections with the west mixed train.

Financial footing. A form of agreement had been drawn up which would be placed before the Council. Cn. H. Moyer, of R. M. Milton was chairman of the board and Mr. S. C. Hall of Alaskan, was the Sec. Treas. Through the recommendation of Nurse Danton, formerly Red Cross supervisor, a motion had been engaged, and things were now running smoothly.

Hawtin—That this Council express their satisfaction at the action of the committee re Alaskan hospital and confirm the action that has been taken (Loan advanced \$100).

The agreement was placed before the Council, and it was moved by Cn. Edwards that this be amended under section 3 by making provision for repayment of debts to the municipalities from the proceeds of any subsequent surplus earnings and that with this alteration the agreement be signed.

Dahl—That a loan of \$100 be made to the Alaskan Hospital Board to be repaid from surplus earnings at such times as the Board is in a position to do so, and that the advance of the same is hereby confirmed and authorized.

Hawtin—That the Reeve and Sec. Treas. be, and are hereby authorized to sign agreements with the Alaskan Hospital Board. Cns. Hawtin and Rowles, delegates to the Municipal Con-

## Mrs. J. F. Rivers Passes Away

At 3:10 this morning, one of our well-known citizens passed away in the person of Mrs. J. F. Rivers. The funeral service will take place in the Empress Union Church on Saturday, at 2:30 p.m.

vention.—A full report was read by Cn. Hawtin. Montgomery—That the report sent to the local newspapers for publication as containing news of great local interest.

Dahl—That a vote of thanks be tendered the delegates for the manner in which they had looked after the interests of the R.M. Mantario and that this Council be unanimously of the opinion that the expenses incurred were money well spent.

Edwards—That payment of refund to J. Harvey Ferguson, discount on payment of current taxes, omitted from previous list, \$6.00, be and is hereby authorized.

Dahl—That monthly financial statement be accepted and ordered filed.

Montgomery—That cancellation of Culbether townsite be requested by C.N.M., be granted unconditionally.

Dahl—Re letter of Debutante Co. of Canada, in regard to charge for destruction of noxious weeds, sec. 32 & 27, v.3. That proper notice was given and that it cost the amount charged to do the work.

Hawtin—That Grant Johnson be firewarden, Div. 6, vice G. L. Grainger, resigned.

Rowles—That motion of previous meeting, authorizing an amount of \$100 for each division for emergency work be amended to include dredging, where necessary, and that Div. 6 be allowed an additional \$50.

Hawtin—That request of H. Thompson for extension of time to redeem S.E. 35 26 29 v.3 be granted, and the necessary steps be taken to allow him until Nov. 1st, 1932, as soon as the office is advised of the legislation now under consideration.

The following accounts were examined by the finance committee and were recommended for payment:

Extort Union Hospital, Jan., 33.00, Dec. 39.00; Empress hospital, 50.00 and 83.00; Regina Grey Nuns hospital, 15.50; Alaskan hospital, 24.00. Total, 250.50.

Communicated Printers, 6.80 and 7.75; Alaskan News, 3.50; Westman Mun. News, 6.50, 22.50, 1.20; Mantario Telephone, Jan., 2.00, Feb. 1.55; O.K. Rubber Stamp Co., 3.50; S.C. Treas., postage, 19.90; I.C. Dahl, phone, 1.00; J. Fry, coal, roads 6.30; Jos. W. Hawtin, delegates expense, 40.00; T. Rowles, 40.00. Total, 401.90.

Kinch—That above be paid. Dahl—Re acct. Nurse McLean, that amount be paid and refunded, \$108.50, and that the (cont. on back page)

## Anderson Farm At Alaskan, Is Sold To Hutterites

Sale of the 4300 acre Fogelvik farm near Alaskan, Sask., to a number of Manitoba Hutterites, was reported Sunday by G. G. Serkan, Winnipeg lawyer, on his return from completing arrangements for the transfer.

The families of Hutterites from the Maxwell colony, Elie, Man., will be settled on the property according to Mr. Serkan. They have already taken possession.

"The farm is composed entirely of improved land," said Mr. Serkan. "It is one of the best farms in Western Canada and has excellent buildings and equipment."

Andrew Anderson, the former owner, was one of the few men in Canada to get the degree of master farmer. The price paid has not been revealed, but it is understood to consist of a cash payment down and yearly payments in cash.

Payments will not be made on a part cash basis.  
**Loverna Grain Agent Killed**  
W. H. Engle, agent for the Northern Elevator Co., at Lorneville, met his death, April 2, when in the act, it is supposed, of putting on the air compressor. The shafing projects or belt, 27 inches from the pulley and it is presumed that his clothing caught in two key seats on the shaft. He was found by a brother agent beneath the shafing.

Carefully checked and audited by me and found same to be in order.  
Signed, John McNeill.

## St. Mary the Virgin (Anglican Church)

Third Sunday after Easter.  
Sunday School, 10 a.m.  
Evangelism and sermon, 7:30 p.m.  
Cavendish, school house, evangelism and sermon, 3 p.m.  
Rev. J. P. Horne.

An out-building at the rear of the Murray residence caught on fire from hot ashes on Wednesday. Hot ashes and rubbish fires constitute a grave danger if proper care is not taken.

## FREIGHT TRUCK LICENSE FEES PROVINCE OF ALBERTA CLASSIFICATION OF TRUCKS

All freight vehicles and trucks, in addition to paying the fees set out below, must also pay the motor vehicle license fee as formerly, according to wheel base measurement.  
CLASS A—Includes all trucks used as public carriers for freight haulage. Fees printed below.  
CLASS B—Includes all freight vehicles other than those in the other classes. Fees printed below.  
CLASS C—Includes trucks operating within cities, towns and villages. These are permitted to operate outside to the extent of five miles beyond the corporate boundaries of the cities, towns or villages in which they are licensed. No fee in this class other than annual motor license.  
CLASS D—Includes trucks owned by farmers, market gardeners, or ranchers and used for the transporting of their own property. No fee other than annual motor license.  
CLASS E—Includes trucks in Classes "C" and "D" used for hauling grain between August 1st and December 31st in one year. Fee in this class one-quarter of those in Class "B".

**FEES FOR CLASSES "A" AND "B"**  
Fees for Classes "A" and "B" are figured on gross weight, which shall mean the combined weight of the chassis, body and cab of the freight vehicle and the manufacturer's rated carrying capacity.  
Fees in these classes range from 50 cents per 100 lbs. to \$1.75 per 100 lbs. according to their weight classification.  
Applications for truck licenses, stating weight and carrying capacity of truck, should be made to the

# Federal Government Considers Question Of A Railway Outlet For The Peace River District

Construction of the Peace River district railway outlet was a matter for consideration by the federal government, R. J. Manion, Minister of Railways, told the House of Commons. Although much thought had been given to the question, the administration was not prepared to announce its decision at the present time.

"I believe firmly a Peace River outlet will have to be built," said the railway minister. "It is only a matter of time, a question as to when it will be built."

Neither the Canadian National nor the Canadian Pacific Railway considered the Peace River outlet an economic feasibility at the present time, said Dr. Manion. They would undertake its construction. This threw the question back to the Federal Government.

Charles Stewart, former Minister of the Interior, considered the Peace River outlet so important he advised the government to delay for a short time the St. Lawrence River development and give precedence to the far-western railway.

The Peace River outlet has become a perennial question in the House. It is proposed to link the "agricultural empire" of the Peace River with the Pacific Coast. Its only connection with the south at the present time is through Edmonton, Alberta. The estimated cost of the western link has been placed between \$15,000,000 and \$20,000,000, depending upon the number and extent of branch lines and the route.

During the past year a committee of engineers studied the problem at the request of Dr. Manion. Their report was unfavorable to the immediate construction of a line which they favored the Obed route. The minister of railways said that Sir Henry Thornton, president of the Canadian National and Edward Beatty, President of the Canadian Pacific, concurred in this report, although Mr. Beatty did not support the Obed route.

Mr. Kennedy said the question of the outlet had been studied with consideration being given to all the facts. The population of the Peace River country had grown from 20,000 to 40,000 people within the last five years, and there had been a drift of new settlers into its district from the dividend areas. Construction of the outlet would provide assistance to people in this district in the development of their farms and would be a better step than the giving of relief.

The yield per acre in the Peace River district was from four to six bushels higher than the yield in the prairie provinces, and the land available in the Peace River section was of the best quality, Mr. Kennedy declared. He took issue with statements of engineers in regard to the paying possibilities in carrying products from Peace River to British Columbia.

Mr. Manion asserted that, if his memory served him correctly, he was president of one of the railways, either Sir Henry Thornton or Mr. Beatty, had declared it would require 10 times the present crop in the Peace River district to justify building the outlet.

The route from Grand Prairie, in the Peace River, to Fort William and also to Vancouver were quoted by Dr. Manion. He did not regard them as unworkable in view of the distance involved.

**Interesting In Importance**  
The new science of aerial photography as applied to mapping is playing an increasingly important part in the mapping work of the topographical survey, Department of the Interior, adapted as it is to the needs of the country like Canada. The work of taking the aerial photographs is performed through the co-operation of the Royal Canadian Air Force, Department of National Defence.

"Is there any greater misfortune than to be married to you?"  
"Yes—to have to live with you!"—Die Mäusketen, Vienna.

W. N. U. 1934

## One Farmer's Opinion

**Manitoba Man Says Stock On Farm Means Salvation**

"The only salvation for the western farmer today and for all time is to get some stock on his farm as quickly as possible. It is far better to take a number of small profits spread over the year than to lose all profits on the main investment, such as wheat."

Such is the statement of Thomas Wood, of Elm Creek, Manitoba, past president of the United Farmers of Manitoba, and a director of the Dominion Agricultural Credit Company, Limited.

Mr. Wood is one of the most active exponents of diversified farming methods for western Canada and for the past 35 years has operated his own homestead, Sunnyside, a 100-acre tract at Elm Creek, no named in honor of his native birth near Boston, Berwickshire, Scotland.

## Hardy Norsemen

**Canadian Author Tells Of Characteristic Of Norse Forefathers**

Norsemen have "a passion to see humanity conquer obstacles," said Mrs. Laura G. Salverson of Winnipeg, Canadian author, whose forefathers were Norse, addressing the Helicon Club at a meeting in Toronto. This passion, she said was the reason for "the grunting, roaring and howling in the tales of Norsemen in Icelandic stories." The tale of Romeo and Juliet, to the Norseman, would be a "cowardly story," she declared. She expressed hope of some day telling the Canadian people sagas of their way ancestors told them.

By Annette

**A DARLING WEE MODEL THAT IS EASY TO WEAR, TO MAKE AND LAUNDER**

Happy! Well I guess in such a comfy dress for playtime! The dropped band shoulders form the brief sleeves.  
It's so simple, it could almost be run up on the sewing machine and finished before breakfast! Just a few lines to join and finish the neck and arms with the applied band and a red and white plaid cotton muslin with plain white is fetching, as pictured.

Light navy blue plique with tiny white dots and plain white trim is typically French.  
Brimless, buttoned prints and dotted aprons are dainty as can be and sturdy too.

Style No. 984 is designed in sizes 2, 4 and 6 years.  
Size 4 requires 1 1/2 yards 22 or 24 inch with 1/2 yard 33-inch contrast fabric.

Price of Pattern 25 cents in stamps or coin (coin is preferred). Wrap coin carefully.

## PLAY-BOY MURDER

Frank Dupuis was certainly the life of the party at the 1932 Canadian International championship golf and derby just run at the Ancelst. Camp, in the wilderness in Quebec and when he came with his team to the starting point at the Drouin Bridge, the huge crowd assembled gave him a great ovation.

He staged quite a vaudeville act, throwing handkerchiefs, dancing, singing snatches of old French-Canadian folk songs.

His striking individual attitudes and, as he went away, he took kisses to the crowd like a popular prima donna. "Sacre fou!" the crowd yelled affectionately, as he passed from sight, standing with one foot on the runner and waving the other at them. Frank who is well over 20, is a handsome young man.

At the prize-giving at the Chateau Frontenac, the famous Canadian cliche hotel, he gave a rite-throwing speech ending by handing the fifty-dollar cheque of his winnings to his wife, "Maggie," a Scotch girl whom he married during the war, for Frank is also by way of being a war veteran.

## Lipton's Fortune

**Efforts To Win Yacht Cup Removed Clouds From Millionaire's Fate**

Sir Thomas Lipton's efforts to win back the America's cup for Britain removed him from the millionaire class just before he died, so his friends say.

It was believed at the time of his death in October, that his will would show a fortune ranging from \$100,000 to the total estate was worth only \$60,000.

"The America's cup races cost Sir Thomas very much more than was generally realized," said one of his most intimate associates. "Besides, he disposed of several large sums of money in the years before his death."

Lipton's affection for his friends in the yacht world was well known. He bequeathed the gold loving cup, which was bought by popular subscription and presented to him on his last visit to New York, to the New York Yacht Club.

The greater part of the Lipton fortune went to hospitals and charities, although many substantial gifts were made to friends and old servants in both Britain and America.

## Radio Convention

**Canada Urged To Take Part In International Meet At Madrid**

An appeal to the Canadian government to lay down a solid foundation for the future of Canadian broadcasting at the International Radio Convention in Madrid was voiced by Graham Gray, speaking for the Canadian Radio League before the House of Commons.

Canada's interests were in getting more of the channels now used by the United States or securing extra channels through an enlargement of the broadcasting band. If Canada were not represented at Madrid, she would not have a vote on the move to enlarge the band and Canada's vote might be just what would be necessary to decide the issue.

## Indian Population

**Increased figures Shown For Saskatchewan and B.C.**

The Indian population of both British Columbia and Saskatchewan increased during the last 10 years, figures issued by the Dominion Bureau of Statistics, indicate. Indians on British Columbia reserves in 1931 totalled 23,297, an increase of 2,955 in the decade; on Saskatchewan reserves, 11,939, a 10-year gain of 1,865.

British Columbia has a population of 691,263, an increase of 170,281 in the past decade, figures for the coast province census of 1931 show.

The population of federal electoral districts is: Cariboo, 52,700, increase, 12,868; Comox-Alberni, 25,600, increase, 3,991; Fraser Valley, 68,567, increase, 9,696; Kootenai, East, 22,566, increase, 3,429; Nanaimo, 55,524, increase, 7,514; New Westminster, 69,294, increase, 12,312; Skeena, 30,353, increase, 1,424; Vancouver-Burrard, 82,515, increase, 25,221; Vancouver Centre, 75,234, increase, 14,253; Vancouver North, 32,972, increase, 8,757; Vancouver South, 89,566, increase, 43,419; Victoria, 143,531, increase, 30,000; East, 63,737, increase, 4,333; Kootenay West, 26,943, increase, 9,441.

## Official Smoke Inspectors

**Men In London Keep Tab On Prohibited Kind**

Probably the queerest job in London is that of two men whose job is to look out for smoke. The London Council has strict regulations against the emission of smoke from chimneys. On the roof of the Underground power station at Little Road, Chelsea, is a little hut inhabited by the smoke spotter on duty. He looks anxiously at the great chimneys, and then produces a glass screen. This is colored with four different shades. He looks through his screen and compares its color with that of the shades on the glass. Should the smoke be of the same hue as the darkest of them, the smoke-spotter presses a button. Instantly bells ring, hooters blow, and covered 20-ounce signals appear in various offices. One furnace is emitting smoke of a prohibited kind, and the boiler-room hums with activity until the smoke-spotter from his lofty perch gives what is literally the "all-clear."

## One Of Biggest Structures

**Department Of Commerce Building In Washington Has 8,000 Rooms**

The new Department of Commerce Building in Washington, D.C., is one of the world's biggest structures. It cost \$17,000,000 and is 1,087 feet in length and 412 feet in width, covering an area perhaps greater than that covered by any other monumental building in the world. It is the key building of the famous Federal tripartite project in the nation's capital. The building has 8,000 rooms and thirty-six elevators. About 60,000 pounds of brass pipe have been installed. All hot water lines, including those six inches in diameter and all cold water lines up to three inches in diameter, are brass. Fifty master plumbers and sixty helpers worked for two years putting in these lines. The building has some sixteen acres of terrazzo flooring in two-foot squares.

Netherlands East Indian government plans a \$60,000,000 loan.

In the past two decades the use of alloy steels has grown ten-fold.

# Gold Producing Provinces Of Western Canada Adding Materially To Nation's Wealth

## Peace Garden

**Proposed To Plant Decorative Strip Three Thousand Miles Long**

Recently a number of Canadian business men in England have been soundly as to the likelihood of their giving financial and other support to a picturesque scheme for establishing a strip of decorative landscape garden the whole of the way along the Canada-United States border. This border is already famous for the absence of a single fortification. The idea appears to be that a fund of five million dollars be raised by public subscription in the United States and Canada, the bulk of which might come from those who might benefit by the tourist trade likely to be increased greatly by such an attraction. The strip, extending 3,000 miles long might be maintained by the interest on such a fund.

At various points along the border botanical museums and arboreums might be established where delicate trees and plants could be reared, such a project would provide work and incidentally settle the problem for many parents of what to do with their sons because of the limited number of good gardeners in North America.

Such a garden would bring much business to both Canada and the United States and because of its unique position, forming the boundary between the two countries and because of its great magnitude, stretching 3,000 miles and dividing a continent, it should merit a place as perhaps the eighth wonder of the world—Ergina Leader.

## A Mechanical Thinker

**Can Solve Differential Equations In A Few Minutes**

A new mechanical brain of steel alloys at Massachusetts Institute of Technology furnishes a suggestive picture of the probable power consumption of the human brain in thinking.

The mechanical "thoughts" are only of one kind, the solution of differential equations. Some of these hours or even days for the human brain. The mechanical "thinker" completes them in a few minutes. The robot brain is called the differential analyzer. Its food is electric current. One flywheel of force controls it, and it consumes about one-horse power for 10 minutes to solve a problem.

## Law Of Averages

**Gloom Of Depression Cannot Last Much Longer**

"A modern philosopher acquainted with the fact that no happiness may be an occurrence, two similar happenings may be a coincidence, but fourteen similar happenings constitute a law. In the 132 years since 1890 we have recorded fourteen periods of unprecedented prosperity that followed thirteen depression periods. We have spent one quarter of these years steeped in the gloom of depression. So have we enjoyed 99 years of plenty. The law of averages is pleading with us to permit it to function, but we prefer listening to the milks who predict disaster with finality." The Financial World, February 10, 1932.

## Printers Are Responsible

**Expression "Out Of Sorts" Is Used By Compositors**

For the expression "Out Of Sorts" printers are responsible. The different kinds and sizes of type used by a compositor are called "sorts." Sometimes his supply of some kinds may become exhausted, when any kind in hand may have to be suspended until his "font" is replenished from the typefoundry or the machines. While waiting for supplies, he is, of course, being unable to work properly, "out of sorts."

According to preliminary estimates of gold production for 1931, the Yukon Territory and the gold producing provinces of British Columbia accounted for some 250,000 ounces, or nearly 11 per cent. of the total production of the country. Manitoba's output advanced from 23,199 ounces in 1930, to 100,510 ounces in 1931. The output from British Columbia decreased from 161,331 ounces in 1930, to 103,634 ounces, and that of the Yukon was slightly in excess of the previous year.

The increased output from Manitoba is largely accounted for by the continuous operation throughout the year of the Hudson Bay Mining and Smelting Company's smelter at Pin Point, according to Mr. A. H. A. Robinson, president of the department of Mines, Ottawa. The mill treats the copper-zinc-gold-silver ore from the company's Pin Point ore body and from the Sherridon starting point mine at Sherridon. The Central Manitoba mine, operating a straight shaft, has produced a proportion of the province's production to the value of \$30,000 to \$40,000 monthly during the year. The Gen Lebe Mine in the same section contributed a few thousand dollars to the output.

A 50-ton mill is now in course of construction at the property, and will replace a small mill which was not equipped to recover all of the gold content of the ore. In the summer of 1931, near Central Manitoba, a cyanide mill having an initial capacity of 150 tons is expected to be in operation during the present month.

The decline in British Columbia's output is attributed to curtailment of production from copper mines, from which, normally, about 19 per cent. of the total output is obtained. A smaller output from the Premier Mine, long the chief gold producer, has been reported. The output of the Nickel Plate Mine. These decreases, however, were partly compensated by largely increased production from the Hudson Bay and the Union Mines and by a larger output of placer gold.

The silver property in the Grand Forks district was once a silver mine, but recent developments have changed it into a copper mine. The property, The Reno Mine, on Sheep Creek, in the Nelson district, is a small property and its operation may be suspended for some time. The property is also an old mine which has been re-juvenated, and which gives every promise of maintaining a profitable production for many years. A new mill with a daily capacity of 300 tons is being erected on the property. The mine now on the property, and a shaft is being sunk to a depth of 3,000 feet. The vein has been proved for a length of 1,800 feet on the eighth level with an average width of 3 1/2 feet. The ore on this level averages 25 to 30 tons per ton. In the 132 years since 1890 we have recorded fourteen periods of unprecedented prosperity that followed thirteen depression periods. We have spent one quarter of these years steeped in the gloom of depression. So have we enjoyed 99 years of plenty. The law of averages is pleading with us to permit it to function, but we prefer listening to the milks who predict disaster with finality." The Financial World, February 10, 1932.

In a recent paper on "Lode Gold Mining in British Columbia," Mr. J. D. Galloway, the Provincial Mineralogist, estimated the reasonably indicated gold reserves in the known mines of the province, and in possible extension of known ore-bodies, to be \$200,000,000. This is exclusive of placers and probably as large a reserve as the province has had at any one time in its history; yet, since 1882, lode gold to the value of \$140,000,000 has been produced. Reserves indicated in fact, in conjunction with the probabilities and possibilities of semi-developed mines, prospects and unexplored areas portend a bright outlook for gold mining in the province.

In the Yukon the placers in the immediate vicinity of Livestock were being prospected vigorously during the summer of 1931. This area had been prospected for about 10 years for a number of years. Considerable activity was also in evidence in the vicinity of Chukchee, where a lode gold discovery was made during the summer of 1930. The scene of the discovery was later visited by a number of geologists, but no reliable information is available as to its nature or extent.

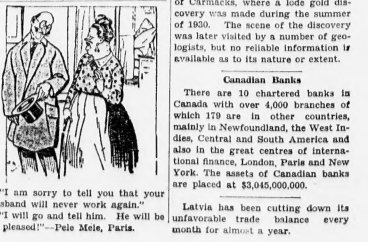

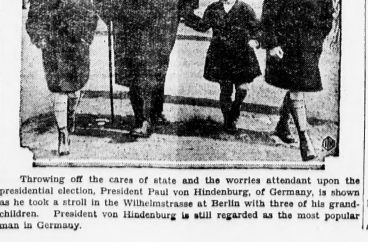

## Canadian Banks

There are 10 chartered banks in Canada with over 4,000 branches of which 170 are in other countries, mainly in Newfoundland, the West Indies, Central and South America and also in the great centres of international finance, London, Paris and New York. The assets of Canadian banks are valued at \$3,045,000,000.

Latvia has been cutting down its unfavorable trade balance every month for almost a year.

# "Old Granite" Softens Up

President Hindenburg, of Germany, is shown as he took a stroll in the Wilhelmstrasse at Berlin with some of his grandchildren. President von Hindenburg is still regarded as the most popular man in Germany.

## Farmers Can Beat Hard Times

Should Get Together and Print By Each Other's Experience

P. C. Colquhoun, corn king of Saskatchewan, from Maple Creek, spoke to a gathering at Caron, Sask., recently, and told of success in farming under conditions similar to the present time.

Mr. Colquhoun first advised the farmers to get together and help one another and profit by each other's experiences. Practical experience, he said, was a good teacher and life a school; make a study of the present conditions and utilize what there is on hand.

He strongly discouraged the all wheat farming. "Better to get the big stuff and be sure of a living," he said. "The business of the farmer is to build a home and make the farm interesting for his family. To balance the program of farming and assure a little revenue at all times of the year, there must be a variety of farm interests, grain, stock, poultry, bees and gardens."

Mr. Colquhoun explained how Russian thistle could be used for feed. Instead of the thistle being a weed it should be recognized as a God-send, for it will thrive when everything else fails. The thistle should be cut while in blossom, piled in bunches and let dry a few days before stacking; it is also an excellent feed for cattle. He said thousands of cattle in the Maple Creek district were wintering well on Russian thistle; eye chop, feed thistle, made a good combination, and eye, if cut at the proper time, was splendid feed for horses. Eye for feed must be cut when the kernel is well filled and in the dough stage. The growing of eye helped solve the problem of soil drifting four successive years on undrained land and Russian thistle could not choke the eye crop as it does wheat. He advised sowing a number of different kinds of grain, corn, alfalfa, and sweet clover included.

### A Challenge To Justice

Toronto Man Says Drug Traffickers In Canada Not Sufficiently Punished

Dr. A. J. Vining, of Toronto, who has been seeking to arouse public opinion in regard to the danger of drugs in narcotics, says the sentence in Canada are not adequate. Speaking in Toronto he charged that one dealer was caught and given a three-month sentence. He did not serve it. Dr. Vining claims that the reason was because he had influential friends who saw to it that he was at liberty within 26 hours.

It is not likely that Dr. Vining would make the charge unless he were certain of his facts, and the charge having been made, cannot be ignored. We have believed there was very little—if any—of this kind of business in Canada.

The accusation is an open challenge to our system of justice, and those in a position to do so should at once review this case and tell the public whether Dr. Vining has stated the facts as they exist.

### Just As Sensible

We don't know who's guilty of this one but here goes:  
"It's Bess bedecked herself with gaudy beads here when bid.  
And feels bemused when very cold, bewails her lot when chid.  
Why shouldn't she bedress herself with garments and befit?  
Herself with food and feed begat a nice look to breed!"

### Old Man Is Good Skater

William Chambers, 85-year-old resident of Welland County, on March 24th made his annual skating trip over the frozen Welland River from Chambers to Welland. He covered the 10-mile journey in an hour on Dutch skates less than 100 years old.

"You say you have been robbed of six handkerchiefs?"  
"Yes. As proof, this is one like them."  
"That is no proof. I have one like that myself."  
"Yes. I have lost several!"—Pele M'Le, Paris.

W. N. U. 1854

## NOTES ON GARDENING

FREQUENT CULTIVATION IS NECESSARY FOR RAPID GROWTH

The secret of early and tender vegetables is quick maturity. Anything that receives a check during growth will be tougher or less prolific than that which comes on unbalanced. To achieve the desired result, keep things moving by frequent cultivation, watering if possible during dry weather, and an application or two of some commercial fertilizer rich in nitrogen. In using this fertilizer, however, be careful that it does not actually touch the plant. Either rake it in close beside or under the seed or, better still, dissolve it in water, and apply in the form of a liquid. For the man just starting, the following list of vegetables planted in the best Canadian information available will be found useful: Asparagus—Mary Washington, satisfactory from the standpoint of disease resistance and a good cropper. Beans—Pencil Pod Black Wax, Round Pod Kidney Wax, Stringless Green Pod Wax, Kentucky Green Wax, and Kentucky Green Pod as pole sorts. Beets—Early Wonder, Flat Egyptian Early and Detroit Dark Red, later. Cabbage—Golden Acre, as a round-headed first early, followed by Copenhagen Market and Enkhuisen going to the melting pot in the great west. Cauliflower—Snowball and Earliest Dwarf Erfurt. Carrots—Chantney and Danvers. Corn—the early varieties Golden Sunshine, Early Market, Golden Bantam and Borden's Wonder. Cucumbers—Golden Wonder, Evergreen for later use. Cucumbers—Improved White Spine and Davis Perfect. Celery—for first early early Plume or Wonder. Cress—Golden Plume; for second early, Paris Golden Yellow or Easy Blanching; for winter keeping, Grand Rapids or Winter Wonder. Lettuce—Grand Rapids. Onions—Yellow Globe Danvers, Red Wetherfield, Prize Taker Yellow Globe and Prize Taker Yellow Globe. Peas—Early Wonder, Laxton's, Gradus, Little Marvel, Laxton Progress and, of course, American Wonder. Parsnip—Hollow Crown. Radish—Scarlet Turnip, White Tip, French Breakfast and Scarlet Globe. Spinach—Bloomsdale and King of the Spins. Chard—Tutillous, the leafy part of this vegetable is used as a spinach while the fleshy stem may be cooked as asparagus. Lettuce served with cream sauce. Tomatoes—John Bar, Bonny Best, Chalk's Early Jewel, while Livingston's Globe, Grand Rapids and Sunburst are two of the best for forcing and staking.

**PLANT SWEET PEAS AS SOON AS POSSIBLE**  
Too much emphasis cannot be laid on the necessity of getting the sweet peas in early. As a rule failure in growing this really beautiful flower traces to late planting or to neglect of a few simple rules regarding care. Select the first spot in the garden to dry out so that the seed may be sown in the earliest possible position. Deep, open soil and deep planting is necessary. Dig a trench two feet deep. In the bottom of this put a foot layer, well tramped down, of rotted leaves, manure or some other vegetable refuse which the roots can penetrate easily and cover with three inches garden loam. Plant seed in this two inches deep and four and four inches apart. As soon as the plants appear, gradually fill in the trench a half inch or so every week so as to develop further root growth, which is absolutely necessary to carry plants through hot weather and keep up the blooming. Sweet peas, like the garden sort, are a cool weather plant, and it is to keep them blooming until frost cuts them down their roots must go down into cool soil. Climbing supports, such as brush, strings or wire, four feet high, is necessary.

**MULCH PAPER MAY HELP**  
Paper mulch is now being used in this country. This is simply coarse, tough, black paper, which is laid on the soil between rows of vegetables. It will stand considerable traffic, particularly if rubber footwear is used, and will last a whole season. It keeps down weeds, conserves moisture and hastens growth because it catches the sun's rays and adds warmth to the soil. Any one who has placed his hand on a tar paper roof during the middle of the day when the sun was shining will understand the latter point. In his garden last summer, the writer found that wire staples made out of the ordinary cheap black wire were a very good method of holding the paper down to the soil, although stones and soil heaped along the edge will also do. Row seed along the edge

## Gargoyle Gold for Britain

The hunt for gold in England goes on unabated as the gold-selling rush which has been drawing thousands of Britons to the offices of the bullion merchants for the last few weeks continues undiminished. All kinds of novel sources are being tapped for the precious metal. Jewelry and even gold teeth going to the melting pot in the great west of patriotism which has swept the Motherland. The photograph above shows workmen from the Sanger Cigar, at Horley, carrying one of their huge gargoles to the melting pot, where the gold leaf was melted from the figure to do its bit for the common cause.

of the paper before putting down the next sheet, or if plants are being set out make a small hole in the paper and insert.

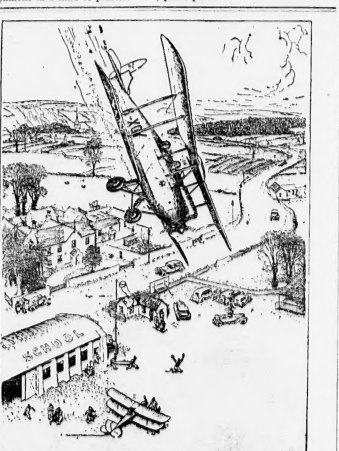

### Drought Resisting Trees

Broad Leaved Green Ash Survives Dry Period Best  
The result of observation made during the past season in the dry areas in Saskatchewan indicates that among the broad leaved trees, the green ash is the most resistant to drought. The American elm occupies the second place, with the Russian poplar, cottonwood and willow in the order listed. When planted alone or in mixed stands, confers such as the native white spruce and the Colorado spruce came through in good condition. When planted among elm, ash, and poplar under rather crowded growing conditions, there were many casualties among both species of spruce mentioned, indicating the difficulty they possess in competition with their broad leaved neighbors. Observation has also disclosed the fact that the mortality amongst trees during the dry period was considerably greater where the stand was thick. Trees widely spaced displayed by far the most vitality.

A little girl was taken to hear a celebrated singer, and later was asked how she liked him. "Oh," she said, "they kept on fetching him back till he sang his songs properly."

Mexico City, built on land that was once a lake bottom, is now constructing its first 15-story skyscraper.

Ants were observed in Europe recently to set broken legs of injured companions in a kind of plaster.

FIRST AVIATOR: "Quick! What do I do now, Instructor?"  
SECOND AVIATOR: "Heaven above! Aren't you the Instructor?"  
The Passing Show, London, England.

## British Speed King

Breaking Records Has Become Habit To Sir Malcolm Campbell

There may be some New York taxi drivers rounding street corners who hold unofficial records, but Sir Malcolm Campbell still has the undisputed official title for the fastest travelling over land. A few weeks ago, at the wheel of his racer on Daytona Beach, he went eight miles an hour faster than he had ever gone before. His speed was nearly 254 miles an hour.

Breaking records has become a Campbell habit. Only seven years ago he held the world's automobile speed record of 156 miles an hour; now he has clipped another 100 miles from that. And when he touched 206 miles an hour four years ago, it was said that the brain and nerve reactions of man would make it impossible for him to achieve more than 250 miles an hour over the ground.

Sir Malcolm has two apparently insatiable ambitions: one is to drive 300 miles an hour, and the other is to seek pirate gold. He has attempted both. He is 47, looks 35, and says he will be driving racing cars when he is 70. He prefers to travel by plane rather than by train. He would rather walk than ride, and he would rather sail a small boat than motor.

A man who drove a mile less than 13½ seconds has no fondness for being at the wheel of a car in city traffic. The latter is dangerous, he believes, and the other hand has not been before a judge for speeding for more than 30 years.

When riding down a hill on a bushy vehicle and going 27 miles an hour, he says of that indelicate. "A brazen cop stopped me at the bottom of the hill. I was not arrested, but 'had' up, which is the more euphemistic term we have in England for being caught. They had me up and fined me \$20.00. A man who was 'had' up at the same time for beating his wife got off with a fine of half a crown. From that I deduced that it is safer to beat your wife than to go fast in England."

Nevertheless, Sir Malcolm doesn't beat his wife, and he has gone fast in England. Mechanically he has progressed from bicycle to automobile, then to airplane and to automobile again. He was a fire before the war, and in the war too. A few years ago the idea occurred to him that in all the desert wastes of the Sahara there might be a smooth stretch of hard sand. He had a long in secret his four-wheeled motor for projectiles, and this project he abandoned after a venturesome airplane flight—New York Times.

## Control Over Insurance

Premier Bennett Intimates That Some Action May Be Taken  
Tightening of state control over insurance companies was foreseen by the House of Commons by Premier R. B. Bennett. An investigation of the business might be some time ago, he said, "I'm hoping that that some of the provinces, uniting with the Dominion, will agree it is to the public interest that the control of insurance be placed in the hands of the Federal Government."

More stringent restrictions on the insurance policy of insurance companies may be imposed, said the Prime Minister, who admitted he was not satisfied with the existing terms of the Federal Insurance Laws. He reminded the House that he advocated at one time restricting insurance companies to the purchase of Dominion of Canada four per cent. bonds.

## Build Boat From Scraps

Builders Claim They Did Not Even Buy Engines  
When two unengaged Austrians of Vienna decided to emigrate to Abyssinia, they lacked funds for the voyage, so they constructed a home-made boat, a strange craft, christened the "Nautilus II," was the result. It was built entirely of scrap iron and other waste materials. The builders insist that nothing was bought for the strange craft, not even the engines with which it is powered. They also claim credit for originating the peculiar design, which somewhat resembles a submarine in appearance.

## World's Highest Voltage Cable

The highest voltage submarine cable crossing the world, rated at 115,000 volts, is to be installed beneath the Columbia River and the Oregon slough so that power can be transmitted directly to Portland, Ore., from the new aerial hydro-electric generating plant on the Lewis River in the state of Washington.

Brother Bob—"I have the greatest news, Gloria has promised to be my wife."  
Sister Bob—"So that's what you call news. A month ago she asked me to be her bridesmaid."

## Use Canadian Ports

Nearly All Canadian Wheat Shipments Now Going Over All-Canada Route

Practically all of Canada's overseas shipments of wheat during the past few months have passed through Canadian ports. During January 92.7 per cent of Canada's total overseas wheat shipments travelled over the all-Canada route and in February the percentage was 93.7.

This is the first time recorded in recent years that the proportion of the Dominion's overseas wheat movement employed by Canadian ports exceeded the 90 per cent mark.

In February the United States handled only 94,600 bushels out of a total of 9,898,363 bushels of Canadian wheat exported.

The ever increasing importance of the port of Vancouver in the handling of Canada's wheat crop is responsible to a great extent for this increasing use of Canadian ports. In the first nine weeks of the present calendar year, 19,824,057 bushels of Canadian wheat were exported through the coast port.

## Use Good Seed

Farmers Are Warned Not To Use For Seed Old Supply For Feeding

The following statement was issued by Robert Weir, Minister of Agriculture:

It is reported that some of the farmers of the prairie provinces are assuming the risk of using seed of old stock for their winter feeding livestock. These feed stores are apt to be injured by frost, and their use for seed may result in crop failure.

In the arrangements for providing financial assistance for feed and seed relief, great care has been taken by the relief commission to provide seed oats that are dependable for crop production and reasonably free from noxious weeds. Those farmers who take the risk of crop failure by using the cheaper feed oats for seed purposes are very apt to find themselves seriously in need of further feed relief another year as a result of their own folly.

## Should Be No Distinction

For Safety Auto Drivers Must Be Strictly Sober

One of the few distinctions that judges occasionally can draw seems to have been produced by a New York court the other day, which held that a man can be under the influence of liquor without being actually intoxicated.

This ruling came in the case of a man who having been convicted of driving his auto while under the influence of liquor, was deprived of his driver's license—the official who revoked the license having said, apparently, that being under the influence is practically the same as being intoxicated.

Now, however, the court rules that there is a distinction. And there undoubtedly is one, too; but whether the distinction ought to be made in the case of a man behind the steering wheel of an automobile may be a question. An automobile driver ought never to be anything but cold sober. As a very slight alcoholic dimming of his faculties can be enough to cause a disaster.

## Service For Employees

A windowless factory bearing completion in Fitchburg, Mass., is wired for radio loud speakers through which weather conditions will be announced shortly before the employees quit work, particularly if there has been a sudden change in temperature or if there is a storm.

See where Mahatma Gandhi's spinning wheel has been attached for taxes. Isn't it about time somebody got his goat?

A German chemist is turning insects into copper wire. The bugs assist that nothing was bought for the strange craft, not even the engines with which it is powered. They also claim credit for originating the peculiar design, which somewhat resembles a submarine in appearance.

Scotland has a wave of postal thefts.

# Health Service

OF THE  
Canadian Medical Association

Edited by

GRANT FLEMING, M.D., — ASSOCIATE SECRETARY

Goitre

In the front of the neck is  
situated the thyroid gland. This  
particular organ belongs to the  
group of glands which produce  
a secretion that is passed di-  
rectly into the blood stream, and  
which are known as glands of  
internal secretion. The thyroid  
is an important gland; and seri-  
ous disorders occur if the gland  
produces too much or too little  
of its secretion.

The most common change  
which takes place is an enlarge-  
ment of the gland, described as  
"simple goitre." This condition  
is apparently the result of in-

Hawth.—That the Reeves and  
Sext.—Treas. be a committee to  
arrange a line of credit with  
the Royal Bank for \$20,000 on  
the security of the roll and  
current taxes, or of \$180,000 if as-  
sessment of the roll is not re-  
quired.

The bylaw to advance the  
date of assessment and taxa-  
tion and to allow a discount for  
the payment of current taxes  
before the first day of Decem-  
ber of the year in which they  
are levied, was introduced and  
discussed.

Walker.—That the bylaw be  
given first reading.

The by-law will be considered  
in committee of the whole at  
the April meeting, and should  
reach the second reading on  
that date.

In order that ratepayers may  
acquaint themselves with what  
is proposed to be done and may  
have every opportunity of lay-  
ing their views before the  
Council for their decision, it  
is likely that the third reading  
will not be given till May.

Each councillor has a copy of  
the proposed bylaw, and there  
is also one at the office; owing  
to the importance of the alter-  
ation proposed ratepayers are  
advised to acquaint themselves  
with the general principles of  
the proposed bylaw before re-  
turning it to the Department  
for approval.

A copy of the minutes of a  
meeting of the people of May-  
field district, held in Mayfield  
hall, on Tuesday, March 1st,  
1932, and submitted by Milton  
Leach, secretary of the meet-  
ing was read.

Rowles.—That this Council of  
R.M. Mantario No. 292, wish to  
place on record, our apprecia-  
tion of the manner in which  
the necessary relief has been  
dealt with in our Municipality.

We realize the enormous  
task which has fallen to the  
Relief Commission during the  
months past.

We note with satisfaction  
that plans are already made to  
continue relief up to and dur-  
ing seeding and we trust that  
the Commission will be able to  
continue the service of our  
town's poor and committee dur-  
ing the opening summer months  
and until our people are  
themselves able to take care of  
their needs and thus continue  
as citizens of good standing in  
our Municipality.

Council adjourned at 10 p.m.  
to meet again April 11th at  
Cuthbert, at the usual hour.

C. Evans Sargent,  
Sec. Treas.

sufficient iodine in either the  
food or the water, or in both.  
It occurs most frequently dur-  
ing adolescence, and is more  
prevalent in certain localities  
than in others.

Simple goitre is readily cured  
provided the patient is placed  
under treatment when the  
swelling is first noticed. Iodine  
given in the proper quantities  
will prevent simple goitre, but  
it should be taken according to  
the directions of a physician.

It is necessary to warn ag-  
ainst the indiscriminate use of  
iodine. The success which has  
followed the use of iodine in  
preventing simple goitre has  
led many to believe that iodine  
will cure or aid all forms of thy-  
roid disease. This is a mistaken

idea and it has resulted in a  
great deal of harm.

There are conditions other  
than simple goitre in which the  
thyroid gland is enlarged. The  
use of iodine in such cases is  
not to be considered unless the  
patient is under observation by  
a physician. Iodine is a sub-  
stance with which we are fami-  
liar and we have been accus-  
tomed to applying it freely to  
breaks in our skin; however,  
we should not fail to under-  
stand that it is not to be taken  
internally as treatment, unless  
prescribed.

The progress which has been  
made in treating goitre, is one  
of the real achievements of  
modern medicine. Successful  
treatment, is in many cases  
made difficult on account of the  
use of iodine, in an injudicious  
manner, by the patient before  
coming for treatment.

When there is an enlarge-  
ment of the thyroid gland, there  
is only one safe course to pur-  
sue; and that is to find out  
what form of enlargement it is  
—as there are several forms of  
goitre—and then have proper  
treatment prescribed.

This note of warning against  
the self-prescribed internal use  
of iodine as a means of treat-  
ing all goitre is necessary, be-  
cause iodine is being so used

and the practice is causing  
much needless suffering and  
harm.
